

METODE TRANSFER LEARNING UNTUK KLASIFIKASI CITRA HURUF TULIS TANGAN AKSARA JAWA

Paulus Caesario Dito Putra Hartono 205314159

latar belakang, rumusan, batasan, tujuan, dan manfaat

O2. METODOLOGI PENELITIAN data dan alur

73. TABEL SKENARIO PENGUJIAN visualisasi opsi penelitian

O4. JADWAL timeline pelaksanaan skripsi

OUTLINE.

pendahuluan.

BELAKANG.

Aksara Jawa, Deep Learning, Transfer Learning.

Deep Learning

- meningkatkan *state-of-the-art* dalam, visual object recognition, object detection dan banyak domain lainnya (Lecun et al., 2015).
- citra tulis tangan kurdish akurasi 83% (Ahmed et al., 2022).

Transfer Learning

- menghasilkan akurasi 98% pada citra aksara jawa dengan model ResNeXt (Kesaulya et al., 2022).
- dan 91% pada citra aksara sunda (Khalifa et al., 2022).

RUMUSAN MASALAH

- Bagaimana cara melakukan implementasi transfer learning pada kasus citra huruf tulis tangan aksara jawa?
- Berapa akurasi yang diperoleh dari metode transfer learning?
- Dari beberapa pre-trained model yang peneliti ambil, manakah yang terbaik?

BATASAN MASALAH

- 1. Fokus terhadap citra huruf tulis tangan aksara Jawa
- 2. Transfer learning dengan VGG, Inception, Xception
- 3. Data penelitian adalah aksara Jawa tanpa pasangan (carakan)
- 4. Mencari pre-trained model terbaik yang diajukan

AKSARA JAWA

ba

AKSARA PASANGAN (mati)

TUJUAN

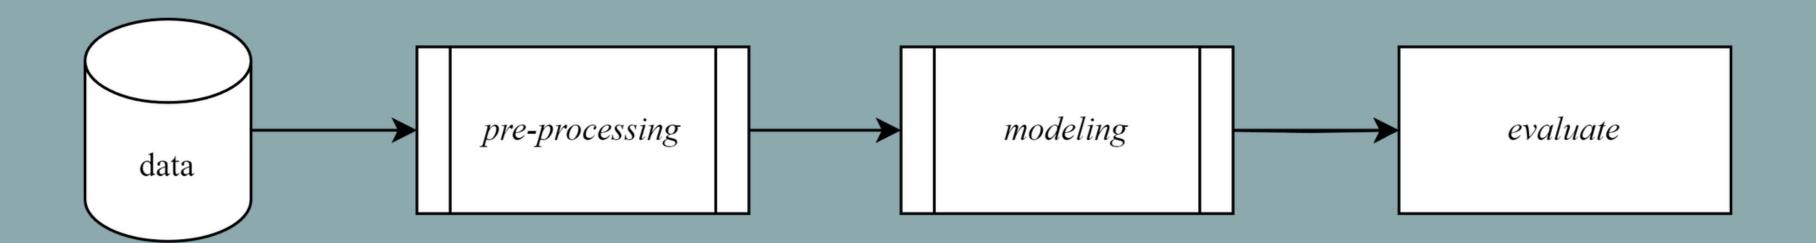

.klasifikasi citra huruf aksara Jawa .evaluasi kinerja model

MANFAAT

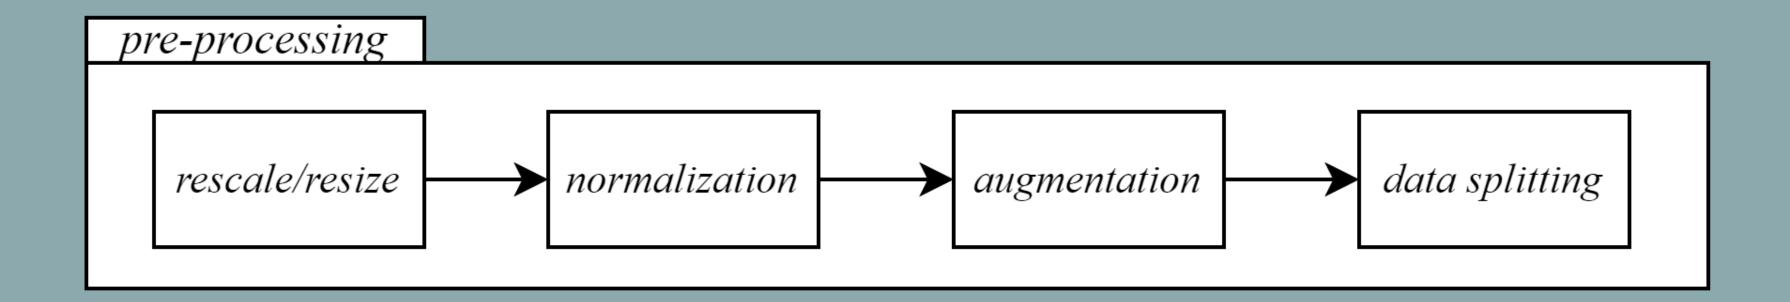

mengetahui performa model dalam kasus ini. membantu orang awam memahami aksara Jawa. referensi penelitian lebih lanjut.

metodologi penelitian.
